

Every child on the planet deserves access to an equitable and quality education. Yet 250 million kids around the world still leave school without critical reading, writing, and math skills — limiting opportunities for higher education and employment. TeachUNITED is determined to change that.

Who We Are

TeachUNITED is a global non-profit dedicated to reducing inequality through education. We focus on underserved communities where educational disparities are most acute.

Education transforms the local communities we serve. It also provides tangible solutions to some of the world's most persistent challenges, including poverty, climate change, and health and gender inequality. By investing in education, we empower teachers and students to incubate long-term solutions to these challenges.

What We Do

Our core belief is that a quality education is possible when students are taught by quality teachers. By providing training, resources, and long-term connections for teachers in underserved communities, we improve student learning outcomes.

 **Training:** Through supportive side-by-side and virtual coaching, skill-building toolkits, and innovative workshops, teachers learn how to create engaging, student-centered classrooms.

 **Resources:** Our tablet labs offer schools mobile, off-the-grid access to digital content that amplifies great teaching and reduces the digital divide.

 **Connections:** Because teachers in underserved communities are often isolated, we connect them with cohorts of other teachers, allowing for collaboration and ongoing peer support across geographic boundaries.

Through deep-rooted experience in education, TeachUNITED transforms schools across cultures.

We rigorously measure the impact and effectiveness of our program.

Our Impact

TeachUNITED is dramatically improving student outcomes for underserved school children — in three different regions around the world, in their existing schools, with their existing teachers.

Our students and teachers categorically outperform their peers:

-  **Academics:** Girls in Tanzania showed a 2x increase in promotion rates. Students in the US showed a 115% growth across all subject areas after just one year.
-  **STEM Subjects:** In math, students in Tanzania saw a 200% increase and US students outperformed their non-TU peers, exceeding national norms on standardized tests.
-  **21st-Century Skills:** Students report double-digit increases in life skills such as collaboration, creative thinking, and perseverance, compared to non-TU peers.
-  **Culture:** Teachers report feeling more motivated and effective. In Costa Rica, 93% of teachers said the program has made them more capable of meeting students' needs.
